

**MANAGING  
AGING PLANTS  
Conference & Expo  
USA 2018**

FOR IMMEDIATE RELEASE  
August 2017

**THE 2018 MANAGING AGING PLANTS USA CONFERENCE & EXHIBITION WILL  
BE HELD AT A NEW LOCATION!**

*Creating a community dedicated to operating aging infrastructure safely and  
efficiently*

Houston, TX—The Materials Technology Institute (MTI) and Stainless Steel World Americas are pleased to present the second **Managing Aging Plants USA Conference & Exhibition**, which will take place on November 13<sup>th</sup> & 14<sup>th</sup>, 2018 in Houston, TX. This dynamic two-day event will be hosted at the newly renovated Royal Sonesta Houston Galleria Hotel, which is conveniently located within walking distance of the Galleria business district. A block of rooms will be available for conference attendees at a special rate.

The 2018 Managing Aging Plants Conference & Exhibition aims to bring together end-users (such as materials and metallurgical engineers), reliability inspectors, plant managers, and maintenance directors from a variety of refining and process industries to address aging-related challenges. The goal is to create a community that can work together to better understand the impact of aging infrastructure so safe and sustainable solutions can be found and implemented.

Just some of the key topics that will be discussed include best practices for aging assets, corrosion, materials damage mechanisms, reliability, risk-based inspection (RBI), safety, sustainability, and welding among many others.
